

A proven Information Assurance leader, well versed and experienced in all aspects of the Certification and Authorization (C&A) process within the Air Force (AF) and commercial programs. A licensed commercial Agent of the Certifying Authority (ACA), Quantech Services with a proven track record providing Information Assurance and Cybersecurity services solutions to the Department of Defense (DoD) and commercial organization.

The Quantech IA Team provides cleared personnel in a lab environment to meet the classification requirements of your system(s). Our DoD 8570.01-M certified personnel have vast experience as Information System Security Engineers (ISSEs) and Certification and Accreditation (C&A) Experts to ensure success to your program. Our personnel hold additional certifications as Certified Ethical Hackers; Penetration Testers; Cybersecurity Best Practices; Cloud Security Knowledge; InfoSec Professional Practices; InfoSec for the Enterprise; InfoSec Research Practices; Solution-Based Research for InfoSec Practitioners and other directly applicable certifications.

Quantech provides a hands-on approach to the ACA

process following DoDI 8510.01, NIST and other guidelines to ensure your system(s) is/are properly tested and documented. We validate Information Assurance (IA) controls and ensure other security requirements are implemented to meet or exceed requirements and deliver risk-focused reports with mitigation strategies. We have a proven track record providing robust security practices under the DoD Information Assurance Certification and Accreditation Process (DIACAP) Services and are poised for Risk Management Framework for standalone systems, enclaves or enterprises and we have the talent to meet your requirements.
